

James Kim

Frontend Developer

Email: developerjameskim@gmail.com | GitHub: <https://github.com/cooolpower> | Location: Seoul, South Korea

ABOUT ME

I'm a frontend engineer with a deep passion for building accessible, pixel-perfect user interfaces that bridge the gap between design and scalable engineering. I take pride in crafting clean, semantic code and have a sharp eye for the small, critical details that elevate user experience.

Previously, I was at Worksphere, where I designed and built robust platform structures, such as dynamic menu engines and fine-grained navigation controls. I also actively drove frontend architecture, leading the layout publishing for major service renewals at JobKorea, and constructed highly reliable, offline-resilient WebSocket architecture for real-time AI chatting.

Over the years, I've worked across diverse environments — partnering with startups, outsourcing agencies, and major platforms like Toss Albar, Kistemp, and Nettrue. These experiences have shaped my expertise in web accessibility standards, cross-browser compatibility, and modular frontend architectures.

In my spare time, you can usually find me researching new web standards, looking through design concepts, or enjoying my time offline recharging for the next build.

EXPERIENCE

2024.05 - 2026.01

FE Platform Team Engineer @ **WorkspHERE LLC**

Led platform-level contributions, real-time AI chatting, and external partner API integrations.

Platform-Level Contribution

- Designed and developed common header components to standardize team-wide collaborative component libraries
- Architected admin-based menu management engines and dynamic rendering systems
- Implemented global navigation state management and fine-grained access control (RBAC)
- Refactored legacy code structure and optimized rendering performance

JobKorea Major Renewal

- Participated in the large-scale service renewal for JobKorea (Main, Search, Resume, Postings, and Login UI/Markup)
- Maintained legacy jQuery codebases and performed incremental refactoring
- Standardized markup structures and applied responsive designs for core layouts
- Contributed to Lighthouse performance tuning to optimize initial mobile and desktop load speed metrics

AI Chatting

- Designed and implemented live WebSocket messaging UI architectures (message state management and sync)
- Implemented socket reconnection handlers backing STOMP channels with exponential backoff
- Applied UI optimistic updates for instant messaging feedback
- Designed offline recovery logic handling mobile sleep states

Toss Open API (TossAlba)

- Architected serverless API infrastructures using AWS API Gateway and Lambda
- Mapped and processed database records fitting external partner specifications
- Designed stateless, highly scalable API architectures
- Constructed Bearer Token authorization and request validation handlers

Skills: html, css, js, react, next, typescript, git, github, jira, confluence, figma, vscode, web standards, web accessibility, lighthouse, performance optimization, aws lambda, api gateway, websocket, stomp

2016.02 - 2016.07

Web Publisher (JobKorea / Albamon / Gamejob) @ **Kistemp Group Co., Ltd.**

Dedicated to Web Standardization and Accessibility Certificate compliance.

JobKorea

- Refactored markup architecture to secure Web Accessibility (WA) certificate marks
- Maintained legacy code structures and performed layout updates
- Took part in web/mobile major service layout renewals

Albamon

- Refactored legacy codebases and conducted layout maintenance
- Participated in service renewals and UI enhancements

Gamejob

- Refactored markup structures to secure Web Accessibility (WA) certificate marks
- Maintained legacy codebases and performed structural optimization
- Took part in web/mobile major service layout renewals
- Created reusable common UI markup structures and component templates

Skills: html, css, js, web standards, web accessibility, jquery, cross compatibility

2015.09 - 2016.01

Web Publisher (Ministry of Public Safety and Security) @ Hyeon

Performed web publishing for public service portals.

Public Safety Portal

- Completed layouts aligning with Web Accessibility guidelines and template guidelines
- Executed semantic markup workflows based on strict W3C web standards

Skills: html, css, js, web standards, web accessibility

2015.07 - 2015.08

Web Publisher (Ezweel Welfare Center) @ A-Mass Consulting

Established web standardization and publishing guidelines.

Ezweel Portal

- Performed web standardization and accessibility enhancement operations
- Assisted in getting Web Accessibility certificate marks
- Crafted common UI component templates
- Standardized overall publishing structures and stylesheet templates

Skills: html, css, js, web standards, web accessibility

2014.10 - 2015.04

Web Publisher (Dongik9 / WithUsIMC / SHAREBLING) @ Centvision Co., Ltd.

Implemented responsive UI layouts for mobile app and web platforms.

Dongik9

- Developed mobile app UI structures and applied mobile optimizations
- Built responsive layouts matching mobile screen sizes

WithUsIMC

- Developed corporate web layouts and UI mockups
- Maintained codebases and revised legacy markup codebases

SHAREBLING v2

- Developed frontend layouts and catalog views
- Managed reusable common UI markup configurations and layout styles

Skills: html, css, js, responsive design, mobile optimization

2014.05 - 2014.10

SHAREBLING Version1 Web Publisher @ Tom & Rabbit

Handled e-commerce and portal UI publishing.

SHAREBLING v1

- Developed service UI structures while managing responsive constraints
- Designed reusable UI architectures and optimized layout components
- Managed cross-browsing alignments and device compatibility

Skills: html, css, js, cross browsing, responsive design

2013.02 - 2014.02

Web Publisher (Overseas Experience) @ Hong Kong local firm (Hong Kong government e-book)

Collaborated on the Hong Kong Government e-book project and KEYPAD magazine site layouts.

e-Book Portal

- Managed multi-device markup and performance optimization for the e-book portal

KEYPAD Magazine

- Led front-facing markup layouts for KEYPAD magazine and overseas clients

Skills: html, css, js, web standards, performance optimization

2011.01 - 2012.10

Web Publisher (Hana Bank) @ Nettrue Consulting Group

Executed web standardization and Web Accessibility (WA) renewals for Hana Bank and affiliates.

Hana Bank

- Formulated web standard and accessibility guidelines and executed markup layouts
- Successfully secured Web Accessibility certificates and led bank renewals
- Developed ION-based web portals
- Managed bank affiliate portals and layouts
- Designed responsive and cross-browser compatible layouts

Skills: html, css, js, web standards, web accessibility, cross browsing

2010.05 - 2010.05

Web Publisher (Freelancer) @ R's Company

Built the Rotiple Sky official website.

Rotiple Sky

- Completed the official website layout publishing

Skills: html, css, js, web standards

2009.11 - 2009.12

Web Designer @ Ire Medi Communication

Built hospital portal web interfaces.

Hospital Sites

- Completed UI publishing for Wils Dental, Born & Born Hospital, and Smile Neurosurgery

Skills: html, css, js, photoshop, illustrator

2009.05 - 2009.05

Web Publisher (Freelancer) @ Paran

Implemented the web chatting layout for Paran.com.

Paran.com Chat

- Developed web chat UI layout and interactive scripts
- Completed real-time chat interface markup

Skills: html, css, js, web standards

2008.09 - 2008.09

Web Publisher (Freelancer) @ Onbinet

Performed layout publishing and site maintenance.

Onbinet

- Performed website UI publishing and layout maintenance
- Improved UI structure and content page templates

Skills: html, css, js

2008.01 - 2008.04

Web Publisher (Freelancer) @ AILF

Published AILF portal site and political campaign promo pages.

AILF Site

- Completed Admin, Main, and Sub page layout publishing
- Developed common layout components and UI templates

Campaign Site

- Created interactive layouts and promotional screens
- Developed campaign promo pages

Skills: html, css, js, web standards

2007.12 - 2007.12

Web Publisher (Freelancer) @ Mirae Asset

Built the global website for Mirae Asset Vietnam branch.

Vietnam Branch

- Completed global web site publishing
- Developed multi-lingual UI templates

Skills: html, css, js, cross browsing

2007.03 - 2007.08

Web Designer @ BETHE Co., Ltd.

Designed and published hospital portal sites.

Hospital Sites

- Designed and published web portals for Rodam Clinic, Banryongam Center, etc.
- Developed common UI templates

Skills: html, css, photoshop, illustrator

2004.11 - 2007.01

Web Designer @ PhyTechnology

Managed HP Online Store layout and public learning portals.

HP Store

- Operated the online store, improved UI, and published promo pages
- Completed operational and promotional layouts

Learning Portal

- Implemented layout publishing and UI structures for public education platforms

Portals

- Designed and published web portals for Jang Bogo Memorial Association, etc.
- Improved layout structure and content pages

Imperial Academy

- Designed and published web portals for educational services

G-Cast

- Designed and published web services, optimized markup, and performed maintenance

Skills: html, css, photoshop, illustrator, dreamweaver

2004.11 - 2005.12

Web Designer @ YM Agency

Developed Flash-based interactive content for JEI Corporation.

JEI Corp

- Developed Flash-based educational contents and interactions

Partners

- Designed and published websites for Sgp21, MBG, etc.
- Improved layout structure and content pages

Hairsis

- Designed desktop software UI and published homepage layouts

Kindergartens

- Designed and published interactive web pages for kindergartens

Mon Studio

- Designed and published photography studio portals

Skills: html, css, flash, actionscript, photoshop, illustrator

PROJECTS

2025.11 - 2025.12

Toss Open API Integration | Serverless API Developer

A serverless infrastructure building project for Toss data sharing. Modeled and transformed internal database records to fit partner specifications while establishing validation and authorization handlers.

Tech Stack: [Node.js](#), [AWS Lambda](#), [API Gateway](#)

2025.06 - 2025.10

Real-time AI Chatbot Service | Frontend Lead

Developed live messaging interfaces with custom AI chatbots. Focused heavily on designing offline-resilient socket connections and seamless user state syncing.

Tech Stack: [Next.js](#), [TypeScript](#), [Zustand](#), [TanStack Query](#), [vanilla-extract](#)

2024.05 - 2024.12	JobKorea Service Renewal Frontend Developer (Layout Publishing) Participated in rebuilding core domains at JobKorea. Redesigned layout markup structures, ensured responsive constraints, and handled frontend optimizations. <i>Tech Stack: HTML/CSS, JavaScript, jQuery</i>
2016.02 - 2016.07	Albamon Portal UI Enhancements Web Publisher Maintained and standardizing stylesheet patterns, optimizing layout components, and creating common interactive controls. <i>Tech Stack: HTML/CSS, JavaScript, jQuery</i>
2015.09 - 2016.01	Public Safety Portal Portal Publishing Web Publisher Designed and standardizing accessibility patterns aligning with public compliance standards. Delivered 100% clean validation results securing government web standard badges. <i>Tech Stack: HTML/CSS, JavaScript</i>
2011.01 - 2012.10	Hana Bank Web Standardization Web Publisher Drafted corporate publishing templates for bank systems, ensuring seamless assistive screen reader layouts, and debugging browser compatibility issues. <i>Tech Stack: HTML/CSS, JavaScript, cross compatibility</i>

SKILLS

Core Technologies	Next.js (App Router), React, TypeScript, vanilla-extract, Zustand, TanStack Query, WebSocket (STOMP)
Backend & Cloud	Node.js, AWS API Gateway, AWS Lambda (Serverless), REST API Design, Bearer Token Auth
Markup & Accessibility	Semantic HTML / CSS, Web Accessibility (WA Certified), Responsive Web Layouts, Cross-Browser Compatibility
