James Kim

Frontend Developer

Email: developerjameskim@gmail.com | GitHub: https://github.com/cooolpower | Location: Seoul, South Korea

ABOUT ME

I'm a frontend engineer with a deep passion for building accessible, pixel-perfect user interfaces that bridge the gap between design and scalable engineering. I take pride in crafting clean, semantic code and have a sharp eye for the small, critical details that elevate user experience.

Previously, I was at Worksphere, where I designed and built robust platform structures, such as dynamic menu engines and fine-grained navigation controls. I also actively drove frontend architecture, leading the layout publishing for major service renewals at JobKorea, and constructed highly reliable, offline-resilient WebSocket architecture for real-time AI chatting.

Over the years, I've worked across diverse environments — partnering with startups, outsourcing agencies, and major platforms like Toss Albar, Kistemp, and Netrue. These experiences have shaped my expertise in web accessibility standards, cross-browser compatibility, and modular frontend architectures.

In my spare time, you can usually find me researching new web standards, looking through design concepts, or enjoying my time offline recharging for the next build.

EXPERIENCE

2024.05 - 2026.01

Worksphere LLC (formerly JobKorea) @ Frontend Platform Developer

Led platform-level contributions by designing a common UI library, developed high-availability real-time AI chatting systems, and drove external partnership API integrations.

Toss Open API (TossAlba)

- Architected serverless AWS API Gateway + Lambda configurations and implemented data modeling & transformation pipelines
- Developed Bearer Token authorization and request validation handlers to achieve stateless infinite scalability and 100% service uptime

Albamon AI Chatting

- Designed real-time WebSocket messaging UI architectures and formulated instant messaging state synchronization algorithms
- Configured STOMP subscriptions with exponential backoff automatic reconnection and optimistic UI updates to reduce user-perceived latencies
- Constructed session resilience logic to prevent packet loss when mobile browsers wake up from sleep states

Common Header Component

- Formulated GNB components using Next.js & TypeScript to enforce design layout standardizations across the engineering organization
- Established dynamic navigation engines backed by Admin platforms to deliver Role-Based Access Control (RBAC) component rendering
- Leveraged Zustand for global state management and utilized AWS S3 to optimize security access policies & history logs

JobKorea Renewal

- Renovated core application page layouts (Main, Search, Postings) and optimized responsive styling layouts using SCSS
- Refactored legacy jQuery modules into modern React components and improved Core Web Vitals based on Lighthouse audits
- Refactored markup architecture to align with semantic HTML guidelines to optimize Search Engine Optimization (SEO) ratings

Skills: html, css, js, react, next, typescript, git, github, jira, confluence, figma, vscode, web standards, web accessibility, lighthouse, performance optimization, aws lambda, api gateway, websocket, stomp, vanilla-extract, zustand

2016.02 - 2016.07

Kistemp Group Co., Ltd. @ Web Publisher

Led web standardization and Web Accessibility (WA) certification compliance for major recruitment platforms including JobKorea, Albamon, and Gamejob, dedicated to improving information accessibility.

JobKorea Renewal

- Renovated core domain layouts (Main, Search, Postings, Resumes, etc.) and optimized responsive web layouts using SCSS
- Refactored legacy jQuery code bases into modular Vanilla JS architectures
- Implemented Lighthouse-driven image optimizations and code-splitting to boost performance indicators
- Designed semantic markup structures adhering to Web Accessibility guidelines to maximize SEO visibility

Skills: html, css, js, web standards, web accessibility, jquery, cross compatibility, photoshop, illustrator, sass

2015.09 - 2015.12

Hyean @ Web Publisher

Performed semantic markup and web publishing for the Ministry of Public Safety and Security public portals, complying with strict web standards.

Public Safety Portal

- Established audit and correction protocols to secure national Web Accessibility (WA) quality certification marks
- Enforced strict accessibility guidelines by coding keyboard navigation accessibility, IR techniques, and alternative descriptive labels

Skills: html, css, js, web standards, web accessibility, jquery

2015.07 - 2015.08

A-Mass Consulting @ Web Publisher

Established web standardization framework and publishing structure guidelines for Ezwel Welfare Center portal to facilitate systematic UI development.

Ezwel Welfare Center

- Developed standard web markups to enforce cross-browser compatibility and template layouts
- Completed Web Accessibility audit corrections to obtain new quality marks for elderly and disabled accessibility
- Drafted corporate styling guidelines and optimized UI interaction scripts according to KWCAG specifications

Skills: html, css, js, web standards, web accessibility, jquery

2014.10 - 2015.04

Centvision Co., Ltd. @ Web Publisher

Delivered responsive UI markup and cross-browsing optimizations tailored for various mobile apps and web platforms.

Dongik9 Mobile App

- Published mobile layouts for hybrid web views and designed responsive layouts resilient to device fragmentation

WithUsIMC

- Formulated cross-browsing guidelines for corporate portals and implemented major UI/UX layouts

SHAREBLING Version2

- Developed custom catalog views and optimized reusable UI component structures for platform upgrades
- Standardized style guidelines and markup conventions to maximize code maintainability

Skills: html, css, js, responsive design, mobile optimization, jquery, photoshop, illustrator

2014.05 - 2014.08

Tom & Rabbit @ Web Publisher

Managed UI publishing and layout design for large-scale e-commerce and shopping platforms, ensuring cross-browser and mobile compatibility.

SHAREBLING Version1

- Orchestrated UI/UX publishing structures and layout templates for the initial platform launch
- Implemented responsive page layouts and cross-browsing specifications across mobile & desktop browsers
- Architected modular UI assets and templates to minimize code redundancy and expedite development cycles

Skills: html, css, js, cross browsing, responsive design, jquery, photoshop, illustrator

2013.02 - 2014.02

MedBirdie @ Web Publisher (Overseas Experience)

Led multi-device markup and publishing design for the Hong Kong Government e-book project and KEYPAD magazine layouts as part of an overseas collaboration.

Hong Kong Government e-book

- Supervised UI/UX publishing for educational portal platforms and migrated massive InDesign typography assets to web layouts

Telitelo project

- Designed user interface components for public GIS platforms and built dynamic animations using jQuery scripting

KEYPAD Site Renewal

- Migrated physical print magazine layouts into digital grid designs to ensure responsive visual optimizations

YouDrumIDrum

- Designed initial UI/UX publishing wireframes and created reusable styling templates

Hong Kong Hair

- Developed branding websites and applied cross-browser markup guidelines

Althy Clinic

- Completed UI/UX mockups and web standard templates for clinic branding websites

Skills: html, css, js, web standards, performance optimization, jquery, photoshop, illustrator, indesign

2011.01 - 2012.10

Netrue Consulting Group @ Web Publisher

Executed web standardization and Web Accessibility (WA) renewals for Hana Bank and affiliates.

Hana Bank Renewal

- Secured national Web Accessibility (WA) certificates and formulated global web standard specifications
- Engineered stable dynamic web views utilizing I-ON Content Management System (CMS) platforms
- Managed cross-browser alignments across various client legacy rendering environments

Skills: html, css, js, web standards, web accessibility, cross browsing, jquery, ion-cms, photoshop, illustrator

2010.09 - 2011.01

Hana Bank @ Web Publisher (Freelancer)

Managed web standard layout assets and operated financial portals as a freelancer.

Hana Bank Renewal

- Executed layout publishing and formulated banking web standard parameters
- Developed dynamic components within I-ON CMS structures and handled cross-browsing issues

Skills: html, css, js, web standards, web accessibility, cross browsing, jquery, ion-cms, photoshop, illustrator

2010.05 - 2010.05

R's Company @ Web Publisher (Freelancer)

Built the Rotiple Sky official website.

Rotiple Sky Official Portal

- Designed and published official portal layouts for entertainment artists
- Developed visual-centric user interfaces and ensured legacy cross-browsing parameters

Skills: html, css, js, web standards, photoshop

2009.11 - 2009.11

Medical Portal @ Web Designer & Publisher (Freelancer)

Designed user interfaces and published responsive layouts for multiple hospital portal sites.

Wils Dental / Born & Born / Smile Neurosurgery

- Designed and published web portals for medical clinics
- Engineered interactive Flash MX animations and optimized layout grids

Skills: html, css, js, photoshop, flash

2009.05 - 2009.05

Paran @ Web Publisher (Freelancer)

Implemented the web chatting layout for Paran.com.

Paran.com Chat

- Developed web chat UI layout and interactive scripts for portal systems

Skills: html, css, js, web standards

2008.09 - 2008.09

Onbinet @ Web Publisher (Freelancer)

Performed website UI publishing and layout maintenance.

Onbinet

- Performed website UI publishing and layout maintenance
- Integrated dynamic visual assets using Flash CS3 to maximize user engagements
- Optimized layout templates and simplified style architectures

Skills: html, css, js, photoshop, flash

2008.01 - 2008.04

All F @ Web Publisher (Freelancer)

Published AllF portal site and political campaign promo pages.

AllF Portal

- Completed Admin, Main, and Sub page layout publishing
- Developed common layout components and UI templates

Campaign Site

- Created interactive campaign promo pages and verified stability on Internet Explorer (IE)

Skills: html, css, js, web standards

2007.12 - 2007.12

Mirae Asset @ Web Publisher (Freelancer)

Built the multi-lingual global corporate website for Mirae Asset Vietnam branch, ensuring regional alignment and optimization.

Vietnam Branch

- Completed global web site publishing and applied dynamic layouts
- Developed multi-lingual layout alignments resilient to text expansion and character sets

Skills: html, css, js, cross browsing, photoshop

2007.02 - 2007.08

BETHE Co., Ltd. @ Web Designer & Publisher

Designed user interfaces and published responsive layouts for multiple hospital portal sites.

Rodam Clinic

- Designed clinic portals and implemented Flash MX-driven dynamic menu systems

Banryongam Center

- Constructed strict table structures to prevent visual layout breakages

123 Clinic

- Conducted portal renewals and minimized CSS rendering blockages

Sosan Clinic

- Tested layout accuracies on Internet Explorer 6 and 7

New York Plastic Surgery

- Leveraged Flash MX modules to increase website engagements

Korean Medicine Association

- Managed concurrent portal renewals for 5 regional branches using SSI

Skills: html, css, js, photoshop, flash, cross browsing

2006.01 - 2006.10

Sat Community @ Web Designer & Publisher

Managed UI components for HP Online Store and developed portal systems for diverse public entities.

Nano Hitech

- Orchestrated brand portal UI layouts and stabilized table grid structures

JEI Corporation

- Created interactive educational modules using Flash MX timeline control

Novauris

- Formulated defensive layouts resilient to English font expansions

Imperial Academy

- Designed responsive page layouts and verified layout rendering on IE

G-Cast

- Standardized dynamic content templates to simplify publishing updates

Sunwoo Data

- Leveraged Server-Side Includes (SSI) structures to speed up development schedules

Korea Shipbuilding Coop

- Renovated association layouts and modularized GNB grids

National Learning Portal

- Published educational views and integrated Flash MX visual items

HP Online Store

- Operated regular updates and constructed promotional event layouts

Skills: html, css, js, photoshop, flash, cross browsing

2004.11 - 2005.12

YM Agency @ Web Designer & Publisher

Managed educational templates and public learning portals.

Jangbogo Memorial Association

- Structured complex historical data archives using table layout architectures

Euna Kindergarten

- Designed branding assets and animated navigation templates using Flash MX

Sgp21

- Segregated global styling components using Server-Side Includes (SSI)

Hanil Kindergarten

- Rebuilt layout structures and cleaned up legacy markups

Mong Studio

- Crafted responsive web portals and verified rendering accuracies

Kyungwon Machinery

- Designed structured product layouts and catalog grids

Skills: html, css, js, photoshop, flash, cross browsing

2004.04 - 2004.05

ImageMate @ Web Designer

Managed HP Online Store layout and public learning portals.

MBG Portal

- Designed corporate UI concept artworks and established brand identity specifications

Hairsys Program

- Formulated Graphical User Interface (GUI) components and navigation layouts for local desktop applications

Hairsys Web

- Drafted branding web screens and designed Information Architecture (IA) parameters

Skills: photoshop

PROJECTS

2025.11 - 2025.12

Toss Open API Integration | Serverless API Developer

A serverless infrastructure building project for Toss data sharing. Modeled and transformed internal database records to fit partner specifications while establishing validation and authorization handlers.

Tech Stack: Next.js, React, AWS SDK, Axios, Node.js, TypeScript, GitLab, AWS Lambda, API Gateway

2025.06 - 2025.10

Albamon AI Chatbot Integration & Live Chat Service Enhancement | Frontend Lead

Developed live messaging interfaces with custom AI chatbots. Focused heavily on designing offline-resilient socket connections and seamless user state syncing.

Tech Stack: Next.js, React, Node.js, TypeScript, Vanilla Extract, Zustand, GitLab, Cursor, Slack, Jira, Confluence, Figma

2024.05 - 2024.12

JobKorea Service Renewal | Frontend Developer (Layout Publishing)

Participated in rebuilding core domains at JobKorea. Redesigned layout markup structures, ensured responsive constraints, and handled frontend optimizations.

Tech Stack: Vanilla JS, jQuery, HTML5 / CSS3, 웹 표준 & 웹 접근성, Bitbucket, Cursor, Slack, Jira, Confluence, Figma

2016.02 - 2016.07

Albamon Portal UI Enhancements | Web Publisher

Maintained and standardizing stylesheet patterns, optimizing layout components, and creating common interactive controls.

Tech Stack: Vanilla JS, jQuery, HTML5 / CSS3, 웹 표준 & 웹 접근성, Bitbucket, Cursor, Slack, Jira, Confluence, Photoshop CS6, Illustrator CS6

2015.09 - 2016.01

Public Safety Portal Portal Publishing | Web Publisher

Designed and standardizing accessibility patterns aligning with public compliance standards. Delivered 100% clean validation results securing government web standard badges.

Tech Stack: Vanilla JS, jQuery, HTML5 / CSS3, 웹 표준 & 웹 접근성, SVN, EditPlus

2011.01 - 2012.10

Hana Bank Web Standardization | Web Publisher

Drafted corporate publishing templates for bank systems, ensuring seamless assistive screen reader layouts, and debugging browser compatibility issues.

Tech Stack: jQuery, HTML5 / CSS3, 웹 표준 & 웹 접근성 퍼블리싱, SVN, EditPlus, I-ON (CMS), Photoshop CS5, Illustrator CS5

2015.07 - 2015.08

Ezwel Welfare Center Web Standardization | Ezwel Welfare Center Project Web Publisher

Designed a web standardization framework for structured UI development on the Ezwel Welfare Center portal and successfully acquired the national Web Accessibility quality mark.

Tech Stack: Vanilla JS, jQuery, HTML5 / CSS3, 웹 표준 & 웹 접근성, SVN, EditPlus

2013.02 - 2014.02

Hong Kong Government e-book Multi-Device Markup | Web Publisher (Overseas Experience)

Led multi-device markup and performance optimization for the Hong Kong Government e-book project as part of an overseas collaboration, delivering responsive templates.

Tech Stack: jQuery, SVN, EditPlus, Trello, Photoshop CS6, Illustrator CS6, InDesign CS6

2007.12 - 2007.12

Mirae Asset Vietnam Branch Global Corporate Website | Web Publisher

Built the multi-lingual global corporate website for Mirae Asset Vietnam branch, ensuring regional alignment and strict cross-browser compatibility.

Tech Stack: HTML / CSS, UI퍼블리싱 및 모션, EditPlus, Photoshop CS2

SKILLS

Core Technologies	Next.js (App Router), React, TypeScript, vanilla-extract, Zustand, TanStack Query, WebSocket (STOMP)
Backend & Cloud	Node.js, AWS API Gateway, AWS Lambda (Serverless), REST API Design, Bearer Token Auth
Markup & Accessibility	Semantic HTML / CSS, Web Accessibility (WA Certified), Responsive Web Layouts, Cross-Browser Compatibility
